Harness your energy and your costs

Make renewable energy work for your business. With Eris McCarthy Renewable Energy, we custom design commercial grade solar systems to suit your electricity usage load profile. If you're a building owner-occupier, let us help you rein in your energy costs.

Our team is one of the Central Coast's most experienced solar designers and installers having completed some of the largest commercial grade solar systems in NSW. Our systems are monitored for ongoing performance to make sure that your investment provides the savings you're expecting.

Why not contact Eris McCarthy for an obligation-free analysis of your energy costs and suitability of solar to provide relief from those rising electricity bills.

At Eris McCarthy, we take pride in delivering long term savings in energy costs and greenhouse gas emissions through quality monitored solar solutions.
