

## Panel Filters

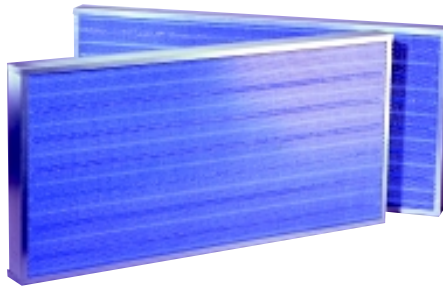

### 20" Sq Barrier Filter Panel

Standard 20"/508mm square barrier panel filter is available in two models: high performance and economy.

- The **P14-6555 high performance** unit is the same one we put into first-fit systems for our OEM customers. It contains 104 sq. ft. of heavy-duty cellulose media, structurally strong via polymer pleat spacers, and is built for long life and high efficiency at low ΔP.
- The **economical P53-4557** panel has 50 sq.ft. of fiberglass media with metal spacers. It provides sufficient efficiency in dry environments with light dust.

### Specifications

- Shape: square panel
- Dimensions:  
inches: 20 x 20 x 5  
mm: 508 x 508 x 127
- Rated Airflow: 1300-2000 cfm
- Carton weight: 20 lbs.
- Liners: aluminized steel

### 2by4 Panel

Our "2by4" replacement panel filters let you put the superior quality, performance and technology of Donaldson-made filters into an AAF filter system. Choose either Duratek™ or Synthetic filter media; both have our exclusive Spider-Web® media treatment.

### Specifications

- Shape: long panel
- Dimensions:  
inches: 46.4 x 22.1 x 3.25  
mm: 1179 x 561 x 83
- Two-inch deep pleats are held in place with hot melt spiral beading inside and outside.
- Liners: Galvanized expanded metal with 74% open area.
- Endcaps: Galvanized metal
- Gasket: Seamless urethane

### Slim VeePac®

Barrier filters in efficient "V" shape, designed to fit TJD, TMD, and other Donaldson "T" series filter houses.

### Specifications

- Shape: vee-shaped long panel
- Dimensions:  
inches: 36.5L x 14H, 6.2W, 3.57W  
mm: 927L x 356H, 157W, 91W
- Rated Airflow: 1000 cfm
- Carton weight: 16 lbs.
- Pleats are held in place with hot melt beading that prevents media bunching, even in high humidity.
- Liners: Galvanized expanded metal
- Endcaps: Galvanized metal
- Gasket: Seamless urethane
