

Release No 3.10 Pre3 Current

Date 11/04/2010

Summary

A major upgrade, including a revamp of the Mail-Out Manager and certification renewal action processing logic.

Major Enhancements

- Rebuilding and extension of the Mail-Out Manager to a wizard format with new search options.
- Features to support certification refresher periods within the renewal period (for use with Apply First Aid / CPR refresher).
Adjusted reminder processing accordingly, replacing reminder sent check boxes with a progress status field. Making a booking in a course which refreshes or renews a certification can prompts the operator to complete or delete actions related to any existing awards in related certifications (e.g. unsent renewal notices or phone calls).
- Changed Offer Details registration/student lists to a single tree view control.
- Added 2 new session class list formats, including competencies; changed class list report format selection to a tree view control.
- Added new Session Chart format, grouped by Teacher (Planning menu / Sessions box).
- Added the option to mark funding codes as exportable and to choose "All Exportable Funding Codes" in the export process. (this is intended to enable Victorian clients to report all data for selected funding codes in a single upload file, as required)
- Changes to result codes, tasks received, tasks marked and assessments done cause the system to ask whether to reactivate inactive offers. Offers are made Inactive automatically due to inactivity so this activity indicates that they are In Progress again.
- Added company merge function.
- Added Due Date field to assessment tasks in result details form, which can be set automatically based on the Module details. AVETMISS reporting now allows results with No Result code to have their enrolment end date extended automatically to the due date of the last planned assessment task (if due dates have been entered). This effectively enables the AVETMISS reporting to automatically handle post-course assessment processes as if the module was continuing until the assessment due date.
- Rearranged Marking reports to sort by Marker, Task & Student, and added Offer No and Due Date criteria, and marker summary format.

Minor Enhancements

- Allowed for date formatting of the Result Dates list on Transcripts.
- Added display of absence reporting to Student Registration details, including [Reset] button (manager level operators only).
- Added warning when selecting a funding-scheme specific export for Skills Victoria.
- Added confirmation in evaluation entry form if closing or starting a new response without saving the current response.
- Added Absent25 event to pick up 25% absence level in attendance tracking by hours.
- On Attempt Detail form, [Success] or [Fail] buttons don't overwrite an existing "Name on Certificate".
- When editing document layouts, Borders are automatically turned off when closing the form (with the [Close] button only).
- On Manual Merge form, show name and company in drop-down contact lists.
- Added validation to NAS Contract in Student Registration Details form (#####9999/9) format.
- Added "Export to PDF/XML" and "eMail as Attachment" to Print Preview Toolbar (Access 2007 only).
- Added the "lost" CRICOS Provider No field into the RTO Details form (for documentation purposes only).
- Added new class list format: a 6-column assessment sheet with mixed widths.
- Added option as to whether to guess or copy the email address of a customer to each student in rego and when duplicating a contact.
- Allowed extended character set characters in text fields (e.g. letter with accents, wingdings, etc).
- When new attempts are created automatically, the Funding Code for the registration is copied to the new attempts.
- Adjusted logic so that Due/Target dates to automatic actions with "Before Due Date" option are both moved back.
- Added Completion Date to qualification attempts (separate to certificate issue / fail date) on detail and qualification document layouts.
- Minor adjustments to country code table for compliance purposes.
- Added the option to automatically retain a copy of the actual content of action emails and letters for selected Action Types.
- Added Contact Notes to phone lists and student programs reports and datasheets.
- Added new Contact Reports format "Student Programs by Course".
- Incorporated surcharge amounts into Payment Due reports.
- Added new format with contact details for use when chasing overdue payments. Also added datasheet option.
- Added criteria to Offer Schedule reports to allow selection of non-available offers.
- Added Logon Id and Password (for the student / target) as form letter fields.
- Adjusted form letter fields relating to registration amounts to use the GST Amt fields instead of the GST check box.
- Adjusted sales reports to reflect the registration Total Price and Paid Amt (i.e. deposits, up-front payment etc).
Enhanced format of some sales reports. Added funding and revenue calculations to Sales Summary by Territory format.
- Adjustments to the wording of the declarations in the Victorian training plan to comply with specific requirements.
- Improved "mark as printed" logic after printing documents so that the system warns the operator of any documents already printed.
- Added student date of birth as a form letter field.

Release No 3.10 Pre3 Current

Date 11/04/2010

- In Session Details form, when the Time Slot is changed, the Start and Finish times change to the default times for that time slot.
- On Evaluation Survey Reports form, the Survey Id criteria now accepts numbers only. It converts to the standard format if required.
- Added Delivery location State Code criteria to Registration (Enrolment) Reports, in addition to Student State Code criteria.
- Added Location/Site/Region criteria and Data Sheet format option to Result Reports.
- Added to the Expected Result options (on the Course Details form), options to issue both a qualification and one or more statements.
- Added option to specify a particular qualification for modules, for AVEMTISS reporting purposes (over-riding the course qualification).
- Added Show Borders option on Form Letter detail form. Adjusted logic for use of this feature on Document Layouts & Form Letters.
- Added Event [!] button to payment details form to allow for re-creation of receipt actions.
- Added No Result criteria to Result Search and use Result / Module / Offer Finish dates (in order of preference) as "Finish Date"
- When adding new sessions on the Offer Details form, the session Teacher defaults to the main for the offer.
- Rearranged the title fields on the Session Attendance entry form, adding module code and name and combining times into one field.
- Added pop-up indicator to attempt detail form when details are locked. Clicking on the label also activates the Unlock button.

Bugs Fixed

- Sales commissions calculated automatically on Registration details form.
- Prevent Print Queue from printing letter which are not yet due (when not highlighting any letters in the list).
- Module Details [Update Results] button copies unmarked (assessment) tasks as well as marked tasks to Result Details.
- Disabled result criteria on Result Reports for Statement Register format (it doesn't make sense to report partial statements).
- Corrected the title of the Marking Reports (the formats with and without Re-Marks were reversed).
- Stopped the system setting the Printed flag after printing a Qualification Certificate and replying "No" to the prompt.
- Corrected wording of the popup message which appears each day that offers change status automatically.
- Show work phone instead of home in the Class List by Teacher report.
- Corrected logic for setting inactive programs to use the correct lag time to avoid premature change to Inactive status.
- Adjusted logic in various places to use new "Availability Option" on Offer Status instead of redundant "Available?" field.
- Changed Layout Export function to ignore the redundant SystemLocked field for compatibility when importing.

Notes

- As a work-around the windows networking problem whereby mapped network drives are not logged when an application tries to access them, the EMT system now offers to "try a bit harder" to open MDB files. It attempts to open windows explorer for the folder because windows explorer seems to force mapped drives to be logged. EMT then tries again to see if the file can be found.
 - Improved performance of Result Details form (by removing VBA functions from bound query)
 - Adjustments to HVTC customised result report format as requested.
 - Changed auto-updater process to include default WEB interface file and Learning folder files.
 - Removed the option to display GST as part of payments and balances. The following form letter fields are no longer supported:
[PaidAmtIncGST]; [PaidAmtExGST]; [PaidAmtGST]; [BalanceIncGST]; [BalanceExGST]; and [BalanceGST].
-

Release No 3.09g

Date 22/02/2010

Summary

A minor update, including an update of the NTIS data.
Learning System content completed up to section 4 (Sales Enquiries).

Major Enhancements

- Added content to Learning System up to Section 4 and printable version of the same content is available in HTML format.
- Added EMT Data Diagram Poster (draft version) in PDF format.
(See C:\EMTProgram\Learning sub-folder for the above documents)
- Added option to download Assessment Task Results from a learning management system and merge the data into EMT results.
- Added Training Packages to Bulk Load and Course Wizard. Updated AQTF data from NTIS.

Minor Enhancements

- Salutation field validated, and is set automatically to the first name in the First/Given Names if there is more than one name.
 - Added average "Days to Register" on enquiry result reports.
 - Added new summarised format "Company Totals" to sales report layouts.
 - Last year at school is checked for a sensible range based on the data of birth (if any) or a wider range otherwise.
 - Option to specify funding details in the New Rego form (at the "Pricing" step).
 - Added Logon Id and Password fields to contact details, and as a Logon Id as a unique contact search criteria.
 - Added Contact Notes field to describe in more detail how best to contact the client and which method to use.
 - Add option to System Settings to choose whether to copy Home/Office Address when duplicating contacts (or to ask each time).
 - Changed logic of award renewal so that the expiry date is always calculated relative to the issue date.
- Update 3.09a:
- Improved performance of Enquiry Search using "Address Begins", "Enquiry No" and "Last X days" criteria.
 - Added "All Active Enquiries" option to Enquiry Search.
 - Automatically log off after a defined number of minutes of inactivity. Defaults to 240 minutes (4 hours) to ensure that any sessions left open at the end of the day are shut down before the next morning and (perhaps) before any overnight backup. You can adjust the time limit on the System Settings Database page (Maintenance Menu).
 - Added "Unknown Markering Activity" criteria to Enquiry Contact Reports, and tidied up criteria description on report.
 - Made the Certificate of Attendance printed flag for each registered student available on the Student Registration Details form.
 - Added Country to the State reference table. Set country automatically in Contact and Enquiry details based on this data.
 - Added initial unconditional confirmation to [Delete] button on Offer Details. Other checks for related data are made if confirmed.
 - On Contact List reports, added Programs by Name format and adjusted Programs by Company layout.
- Update 3.09b:
- Added second qualification defined in dual-qualification course to Training Plan layouts.
- Update 3.09c:
- Added PaymentGST and PaymentExGST fields to Form Letter Layouts to show Charge GST amount allocated (for Tax Invoices).
- Update 3.09d:
- Ignore common joining words "of", "for", "the" & "and" when comparing company names against their capital initials in searches.
 - Added form letter fields for total payments and balance for charge list. Partly paid charges show the amount paid in the paid list.
- Update 3.09e:
- Allowed for date formatting of the Result Dates list on Transcripts
 - Removed adjustment of scheduled hours to zero for continuing enrolments for Skills Victoria (VIC-SV) AVETMISS exports.
- Update 3.09f:
- Changed AVETMISS logic for Commencing Code to indicate start of course rather than start of module.
- Update 3.09g:
- Added a range of warnings to address Skills Victoria validation rules.
 - Changed continuing enrolment code to 70 for planned future year end dates.

Bugs Fixed

- If numeric fields exceed the allowed length, they are automatically filled with 9's (as a fallback in case form fails to pick up the error).
 - Fixed message when deleting actions when Status is customised thus not in the 6th column.
 - Avoid crash and give warning when entering a Paid Amount equal or higher than the Total Price, leaving no balance to charge for.
 - When publishing offers to the web, the DaysOfWeek, StartFinish, Price and GST flag are now copied from the Offer (not the Course).
 - When Results on the Result Detail form are cleared, the linked Award is also cleared. This enables the renewal to happen
-

Release No 3.09g

Date 22/02/2010

again.

Update 3.09a:

-Fixed error with Survey Detail form Chart button showing no data.

-Adjust label of Certification button when Result is cleared, either with [Clear] button or by blanking out the Result Code.

-Fixed issue with Company Name criteria in Contact Reports (Program layouts)

-Forced Module Type to default (not null) when creating a new module.

Update 3.09d:

-Insert line breaks in form letters with charge lists and payment schedules.

-Registration Details form (Billing Details page) Payment Plan drop-down subtracts Amount Paid from the plan installments.

Notes

Release No 3.08c

Date 21/12/2009

Summary

A minor update, including features to help manage funding claims in more detail.

Major Enhancements

Add options to support per-offer (or per-individual-program) AVETMISS claiming:

- New customisable "Claim Status" field to indicate what stage of claim progress has been reached.
- Initial/Midway/Final claim buttons on the Offer details form (Funding page).
- The [Initial Claim] button tries to add the module result records automatically if there are no result records.
- Added option on the AVETMISS File Export form to select a single student to export (ignoring the "Export to AVETMISS" check box).
- Removed the Export to AVETMISS check box from the Contact Details form.
- New format on Offer Schedule Reports: "Offer Funding Status by Course"

Added a new contact import function to enable clients to import contact data from Excel and text formats (on Contact Entry form)

Update 3.08c:

- Implement CQR reporting, for WA only. See new button on the AVETMISS export form.
- Adjusted logic and help on Industry No to allow it to be used as the TRS Number (applicable to WA only)

Minor Enhancements

- Adjusted offer list columns and changed main menu "Available Offers" button to show both offer types.
- Suburbs not in Australia Post list are capitalised automatically.
- Added unit count display to competency list in Course Wizard.
- New format on Offer Schedule Reports: "Offer List by Course"
- Opened up Offer Viability reports for Assessment type offers.
- AVETMISS export process now creates an HTML report (Report.htm) file in the export folder, for future reference.
- Re-implemented Word merge as an Export to Excel only function on the Print Certificates form.

Update 3.08a:

- Added Funding Code and Status criteria to Offer Schedule & Funding reports.
- Added option to mark locations as inactive. Inactive locations are sorted after active ones in the drop-down list of locations. If you select an inactive location, the system asks whether you want to reactivate it.

Update 3.08b:

- Contact Details Statistical page only shown for contacts with the "Student" role.
- When editing certification awards manually, the system offers to re-calculate the expiry date when the issue date is changed.
- In the Settings Wizard, the phone prefix is set based on the home state, and is then used when entering staff phone numbers.
- Materials List is sorted by Material Code by default.
- Added [Customise] button to the Offer Details form (Check List page) to allow editing of the checklist for the offer.
- Added [Preview] button to the Offer Details form (Check List page).
- In Course Details form (Content page), AQTF competencies added using add-to-list options are capitalised automatically.

Update 3.08c:

- Added AVETMISS validation for missing date of birth (VIC-SV only).

Bugs Fixed

- Reverted AVETMISS export process to previous method due to significant performance problems.

Update 3.08b:

- Changed Charge Detail and Contact Detail forms to avoid MySQL "record locked" message.
- Course wizard sets GST Amt to zero if "GST free" option is chosen.
- Settings wizard allows normal entry of RTO Provider Name (in text format).
- On Registration reports, the Funding Code criteria applies to the effective (Registration or Offer) Funding Code.
- Line breaks re-inserted for Student List fields on documents (e.g. group certificates).

Update 3.08c:

- Fixed crash when trying to focus on locked Student No when using "Fix It" list of AVETMISS errors.
- Changed logic for VIC and WA end-of-year to only use end-of-year continuation code 70 when reporting end date is 31st Dec.

Notes

Release No 3.07L

Date 18/11/2009

Summary

A minor update. Added events to manage result entry.

Major Enhancements

- New form to view and fix AVETMISS and RAPT error messages.
- Added new events triggered by result code and assessment task updates. These are designed to inform students that results have been recorded, or to trigger internal processes to be followed for each result (e.g. paying an agent on a per-module basis)
- Replaced the use of Internet Explorer to preview and print HTML documents with the internal viewer (in various places).
- System will automatically delete old daily backups based on criteria on the System Settings form (Database page).
- Automatic session scheduling checks for teacher clashes and leaves the session teacher blank if already busy.
- Session detail form detects and warns about double-booking of teachers and displays a message.

Minor Enhancements

- Removed disused MS-Word export option for documents and related setting.
 - Changed Enquiry Location to a Site and/or Region.
 - Adjusted RAPT export logic to handle non-apprentice/trainee data, and future start & continuing outcomes.
- Update 3.07a:
- Added short descriptions to QI survey question codes to make charts more readable.
 - Course Detail reference form allows add-to-list of qualifications from NTIS list (if found) or manually.
 - When adding qualifications, Recognition Code field set to 11 or 12 depending on "Short Course" flag.
- Update 3.07c:
- Translate AVETMISS reason codes to RAPT codes for RAPT reporting.
 - Added Offer Recall (bell) button on Result Search, Registration Search & Result Reports forms.
 - Improved efficiency of Result Detail form, especially when opening form for multiple records.
- Update 3.07d:
- Added the automated system to explain, find and fix AVETMISS errors.
 - Re-arranged descriptive help topics to improve visibility of the reference sections
 - Added "AVETMISS Errors" section to the help content.
 - Non-restrictive list of values for Subject Area Field of Education field (4-digit level).
 - Evaluation entry has check box to allow you to retain the last response (useful for "Strongly Agree donkey votes").
 - On Statements of Attainments, the [CertificateName] tag uses the Formal name (if there is one for the student).
- Update 3.07f:
- Added new compact list format to Qualification Attempt reports.
 - Use the local default web browser (IE, Firefox, Chrome, etc) in all places where IE was used.
- Update 3.07g:
- Payment Receipt actions are attached to the first offer related to an allocated charge.
 - Removed AVETMISS rule relating to State Provider No in Victoria. The RTO No is used automatically.
 - Adjusted assessment task entry events to include Marker name in action comments & adjusted field positions for assessment-based tasks so that marker is selected before the result is entered (and the action event triggered).
 - Add option to specify a Module Type, including non-reporting and non-competency based alternatives.
- Update 3.07j:
- Offer Status Available flag replaced by more specific Availability Option field (via Offer Status detail form)
- Update 3.07k:
- AVETMISS "FINAL" export gets qualification (NAT00130) year from the last Result Date in preference to Offer Finish Date.
- ## Bugs Fixed
- Negative answer confirmation no longer triggered by QI demographics entry.
 - System requires confirmation when guessing email addresses of students based on customer email.
 - In Rego Search form using Student criteria, if no regos are found for the student, it is treated as a "none found" result instead of using a "match any" criteria.
- Update 3.07e:
- Urgent fix to crash in AVETMISS export process when Subject Area has missing Field of Education.
 - Document count in linked documents label correct even when the list is too long to show in detail.
- Update 3.07b:
- Settings Wizard form now saves certificate authoriser name and position correctly.
- Update 3.07c:
- Fixed popup "parameter" message when printing Transcripts from Print Certificates form (when no lines selected).
 - Removed extra popup message regarding qualification attempts during Quick Rego process.
- Update 3.07e:
- Fixed issue with line breaks (
) in mailing labels (for Name/Company fields, etc)
- Update 3.07f:
- Fixed problem on Statements of Attainments - Issue Date was blank when using "Statement Per Module" option.
 - Avoided some MySQL "Save Record" warnings on System Settings form.
- Update 3.07g:
-

Release No 3.07L

Date 18/11/2009

-Fixed bug with deleting marking history of 2nd assessment task.

Update 3.07h:

-Tick button on the Action List no longer completes every incomplete action when no action is selected!

Update 3.07i:

-Background image now appear correctly when printing documents using the [Print] buttons.

-Fixed bug with [Publish] button on Web Interface when using MySQL interface database.

-Fixed bug with AVEMTISS "Fix Errors" list when trying to fix Subject Area errors.

-Changed fuzzy name logic so that "Denis" is an alternative for Dennis (M) and not Denise (F).

Update 3.07j:

-Fix course structure report to split multiple courses which have the same Course Code.

-Allocate student Role (and Student No if Automatic) when adding student in classroom offers in New Rego form.

-Assessment visit list on Offer Details form shows visits with blank dates as (TBA).

Update 3.07k:

-Session charts more gracefully handle situation where sessions are outside the visible range (highlighting them in red).

-AVETMISS export in NATIONAL mode uses shorter record lengths as per national collection requirements.

-Box caption on Offer Schedule Chart (compact view) shows "Course Code (Offer No)" instead of booking numbers.

-Evaluation Entry form retains non-entry of an answer separate to an actual "No Response" entry. Default answers are not applied

when moving between questions using the error buttons, only after entering a response and moving forward.

-Automatic renewal reminder actions use eMail or No-eMail Contact Methods and Letters, depending on the contact's email.

Update 3.07L:

-Changed document / form letter printing (using [Print]) button to avoid obscure "Permission Denied" windows/IE8 issue.

Notes

Release No 3.06a

Date 19/09/2009

Summary

A minor update to implement the quality indicators surveys fully. This should enable clients to record all QI survey data. How the data is to be used & reported is yet to be defined by the various authorities at the time of this release.

Major Enhancements

- Added "QI Demographics" option to Survey Types and modify Evaluation Entry form to accept standard QI fields (if the option is ticked). Course-related fields default based on course for the linked offer.
- Added the option to label a response with an explicit reference field.
- Added options on Quality Indicators export to save survey data files for importing into the "SMART" system.

Minor Enhancements

- Clarified wording of PRIVATE/PUBLIC offer on New Rego form (New Classroom Offer page).
- Added warning to AVETMISS export when purchasing contract & schedule missing (VIC only).
- Updated reference data from NTIS.
- Course List reference form hides "Not Offered" courses by default (click the "Show All?" check box to see them).
- Course List has button to open the Offer List form showing ALL offers of a selected course (including Finalised offers).
- Added "Field of Study" field to Qualification to enable separation from the Qualification name on certificates.

Bugs Fixed

- Corrected automatic repositioning of Enquiry Value field in (Access 2007 only)

Update 3.06a:

- Duplicating a contact on the Contact Details form copies the company to the new contact.

Notes

In this release, the relinking was tightened up to require text fields at least as long as the schema. Some fields have been extended: CONTACT.LearnerUniqueid (20), QUALIFICATION.QualificationName (100), COURSE.CourseName (100) & OFFER.ListOffer (255). These changes will need to be made manually when updating to this release.

Release No 3.05m

Date 04/09/2009

Summary

An urgent update to implement the changes to the Statistical Data Collection Guidelines in Victoria on 1 July 2009. Update 3.05d also included some simplification to the session-generation logic which will require any clients using the existing module day range / weekly sessions logic to generate module-specific timetables to change their data.

Major Enhancements

- Added logic and new fields to AVETMISS export required in Victoria from July 2009.
 - Added Eligibility Exemption flag to Concession/Exemptions reference table (VIC only).
- Update 3.05d:
- Simplified session generation logic on Course Details form.
 - Course wizard generates sessions for multiple weeks consistent with new course timetable method.
 - Added RAPT reporting for WA providers.
 - Added RTO No field for Certificates and Statements.
 - Added Delivery Language option to Qualification Attempts and to the document layout fields.
 - Added weekly Time Slot options to Settings Wizard.
- Update 3.05f:
- Courses can be defined as leading to a dual qualification and two qual attempts will be created when appropriate.

Minor Enhancements

- Added option to Data Validation functions to find and remove unused company records.
 - Allowed for fuzzy company name match in enquiry and contact searches.
 - Removed option to ZIP QI export files, since they have to be uploaded separately anyway.
 - Course Wizard now sets Expected Result option according to course type selected.
- Update 3.05b:
- In evaluation entry, the last entered answer remains to facilitate faster entry of 'donkey' responses.
 - Improved layout of responses in Evaluation Entry complaint action comments.
 - Simplified course wizard competency selection page.
 - Add button on Survey Details form to enter evaluation results (for that survey).
 - Report button on Survey Details form shows detailed report with comments.
 - Added funding code criteria to qualification attempt reports.
 - Added Estimated Value to enquiry detail form and related Enquiry Analysis report format.
- Update 3.05c:
- Updated some rules to reflect version 1.1 (June 2009) of Victorian AVETMISS standards.
 - Customer Type is not copied when copying details from the customer to new (non-customer) students.
 - When copying customer details to student, eMail is guessed if the original follows a common naming scheme.
- Update 3.05d:
- Contact Duplicate function now optionally copies the contact remarks field.
 - Options to include Department and Position fields on the Action List.
 - Review and adjusted AVETMISS export file format and rules for WA-DET.
 - Added form letter fields for the totals of rego charges list, total GST & surcharge, and added surcharge details to lists.
- Update 3.05e:
- The Module add-to-list function in Course Content and Offer Details forms (with Show All Modules on), and the Competency add-to-list function in the Qualification Details and Module Details forms now get data from the AQTF competency table (if a matching record is found).
- Update 3.06f:
- Added adjustable address block to RTO details to enable RTO-specific details on some reports.
 - Adjust custom assessment result reports for HVTC.
 - Add Time Stamp button added to Remarks field on Contact Details (Reference page).
 - Qualification attempts are created automatically when a student is registered in a qualification-based course, both in the quick rego and in the New Registration form. If a duplicate is found, and you don't want to create a new attempt, the system asks whether you want to link the current registration to that attempt.
- Update 3.05h:
- Moved CRICOS No to General tab of course details and added to statement and cert of attendance layouts.
 - Added form letter list fields to show all regos in the linked enquiry (useful for packaged courses).
- Update 3.05i:
- Added Learner No (e.g. LUI / VSN) and Passport No as form letter fields.
 - Added option to Survey List to add a new adhoc survey (for gathering anonymous responses not linked to an offer)
- Update 3.05j:
- Condensed format of enrolment report by company and adjusted Enrolment Report titles.
 - Adjustments to "Offer Schedule by Date" layout to add Offer Notes field.
 - Indicate when a custom attachment file is used on the Action eMail Preview form.
 - Changed the QI Completion Export to pick use State Code from Offer related to the result or attempt (if available).
- Update 3.05L:
- Added Subject Area to Attendance reports.
 - Adjusted 50-90% range warning on QI report.
-

Release No 3.05m

Date 04/09/2009

Update 3.05m:

-Removed validation rules for Unsupervised Hours in AVETMISS export (it was removed from the files in rel 6.0).

Bugs Fixed

-System behaves more neatly when you try to add a response to a survey with no questions.

Update 3.05a:

-Fix bug with label printing from the letter queue.

Update 3.05b:

-Course wizard session selection for Mon-Fri AM/PM selects correct sessions (default data issue).

-Reduced flicker on Result Details form in Access 2007.

-Fixed issue with blank "Continuing Enrolment" outcome codes for VIC-SV AVETMISS export.

Update 3.05e:

-Course Sessions list Module list refreshed when modules changed on Content page.

Update 3.05g:

-Fix enrolment count total (excluding cancellations) in Enrolment by Offer report.

Update 3.05h:

-Offer No auto-filled to correct format on Results report criteria.

-Fixed crash in RAPT export when there are no matching records.

Update 3.05j:

-Fix bug when creating attempts upon registration and there is no teacher for the offer to default the assessor to.

-Fix "OFFER.CompanyId" pop-up message bug with Class List - Customised.

Update 3.05k:

-Fix issue with [Student No] field in certificates/statements.

Update 3.05L:

-Fixed bug with new back-end databases when previewing and printing form letters, affecting new/rebuilt installations.

-Fixed attempted double-creation of qualification attempts on New Rego form.

-Attempts for "Dual-Qualification (Selected Competencies)" courses now includes only selected competencies.

-Provide Yes & No responses when confirming Unused Company function on Validation form

Notes

Also changed the field name COURSE.Description to COURSE.CourseDesc to avoid possible keyword issues with MySQL back-ends (this change should be invisible to users of the system).

Update 3.05h: Completed Section 4 (User Interface) of the Learning System content.

Release No 3.04d

Date 17/07/2009

Summary

Another minor update primarily to implement enhancements to the eMail queue form.

Major Enhancements

- Send Action eMails form checks for multiple actions with the same email address & offers to delete the duplicates,
- Send Action eMails form continues when errors are encountered, to allow unattended operation.
- Added options (in System Settings) to show Rego details on Enquiry Detail form and edit the Rego Notes field.
- Added Document No to document details, list and search for when the document has a formal identifying number.

Minor Enhancements

- Added State and State Code criteria to Contact Search form to make it easier to check QI Export states.
- Removed duplicated code which was adding too many extra "&" characters in the main menu company name.
- When the PaymentReceipt event creates an action, it is linked to the first registration and enquiry allocated.
- When a payment is deleted, all actions linked to that payment are also deleted (e.g. receipts).
- Corrected pop-up message when logon is denied to describe the procedure to reset the entire system.
- Option to sort the action list by various criteria.
- Option on Company Detail form to copy company details to contacts, and to view details of a selected contact.

Update 3.04a:

- Option to do an enquiry search by Customer Type (for use in direct marketing).
- Option to adjust the columns, widths and sort order in the Enquiry Search form.

Update 3.04c:

- Email addresses are validated in more detail.

Bugs Fixed

- Fixed bug when entering non-numeric days for the "Last X Days" option in Enquiry Search form.

Update 3.04a:

- Fixed bug where Enquiry Detail form switches to the Registration page when adding a new action.

Update 3.04c:

- Form letters with BillTo address fields default to Customer fields when BillTo is blank on the Registration.

Update 3.04d:

- Better handle situation when renewing an expiring certification which has no current expiry date recorded.

Notes

- Turned Access 2007 form tabbing back on.
-

Release No 3.03g

Date 04/07/2009

Summary

A minor release.

Major Enhancements

-Rearranged Action List form, for efficiency and clarity, and added per-operator column customisation options.

Minor Enhancements

- Adjusted name matching to reduce the bonus for vowel matches and add penalty for being different lengths.
- New registrations for individual offers marked as "Customised For" the student name, not the customer name.
- Option to include the year in generated keys (Certificate No, Student Nos, etc), restarting each year automatically

Bugs Fixed

- Fixed MySQL locking issue with document and form letter layouts (affects MySQL back-ends only).
- Only send to salesperson if the check box is ticked (it was CC'ing every time).
- eMail preview doesn't show customer as CC salesperson if there is no salesperson contact on the registration.

Notes

Update 3.02b:

- Restricted "Available Offers" quick list function to Classroom offers only (as in earlier versions).
- Added link to join a GoToMeeting meeting on the main menu.

Update 3.03c:

- Offers no longer made "Inactive" soon after starting, but before any activity has been entered.

Update 3.03d:

- Added option to select standard variations on QI Completion Data export form (to facilitate submission in QLD).

Update 3.03e:

- Added option in the QI Completion data export to convert blank state codes into a selected state.
This option defaults to the state code on the RTO record.

- Default the RTO No format added above to National as this appears to be the only correct format.

(This may be the only option if this proves to be the case in the long term, but it will remain an option for now)

- Completion rates outside 50-90% require an explanation. The export report highlights each case of this for you.

Update 3.03f:

- Added warning message to AVETMISS export when state-based RTO number missing for NSW, VIC & QLD.
- When LUI not present in AVETMISS export, a blank field is included in the record (relevant to QLD only), and tidied up student name shown in warning message.

- New class list format "Customer & Student Details, By Teacher", designed with corporate groups in mind.

Update 3.03g:

- Fixed problem with registration search form using some criteria fields.
 - Modified form letter payment allocation description to call the Rego No an Invoice No (if no actual Invoice No exists)
-

Release No 3.02i

Date 05/06/2009

Summary

Minor release with customer-requested enhancements which didn't make it into 3.01

Major Enhancements

- Option to send class lists to teachers via email (or mail) actions.
- Adjusted form resizing to use new Access 2007 features and re-activated tabbed document interface in 2007.
- Trigger new event "OfferInactive" when Offers are changed to Inactive status due to lack of activity.
- Payment Detail form enables searching for the customer by Name, Company, Invoice No, Rego No or Charge No.

Minor Enhancements

- Action eMail Preview and Customise forms resize main edit box in both height and width.
- New Sales by Month Report, with same data as Sales by Month Chart.
- Added Receipt No to Payment Search criteria.
- Allow partial allocation of payments in Payment Details form.
- Adjusted Payment Type and Surcharge reference forms to show MYOB, Quickbooks or neither accounts.
- New account card options to specify fallback individual card when a company name is not known.
- Removed warning on Module Details reference form when there are no marked tasks or weightings.
- Cancelling a registration on the enquiry detail form but no longer reduces Student Count to 0 and removes students. This allows these cancelled registrations to be counted in the registered but not paid statistics in enquiry reports.
- Adding results in Offer Detail form asks whether or not to create results for cancelled students.
- When modules date are changed on the Offer Details form, the system will update any incomplete result records for that module to those dates. If there is a result code for any of them, it asks for confirmation or cancels the update.
- Change Offer Timetable (Detailed) layout to not group weekly. Renamed existing format to Offer Timetable (Weekly).
- Rename the State Learner No to "VSN" if home state is Victoria and validate using checksum algorithm.
- On attendance entry form [Clear and Rebuild List] button, give the option to retain students already entered.
- Changed action list & reports to show on Late actions the number of days past the Target Date, not the Entered Date.
- Added button on Offer Details (Registration page) to view Student Rego details (above Student list).
- Added Host Employer selection on New Registration form.
- Added residential address to Enquiry Contact and Contact Details reports and re-arranged these reports.
- Improved logic of default "Where To Next?" option on New Registration form.
- When selecting a contact who is not in a role-specific list, the system gives the option to first search for that person. If found, you can give that person the required role. Otherwise, you can add a new contact (as before).
- New option in Action Types to specify a default contact method for eMail and non-eMail. This is used when creating event-based or manual actions to change method based on whether the contact has an email address or not.

Bugs Fixed

- Correct bug when clicking [New Contact] on Enquiry Detail without any names in the search criteria.
- Fixed issue with Sales by Month Chart.
- Added option to specify an optional Surcharge code for each Payment Type.
- Corrected bug preventing deletion of Results on the Result List form.
- Adjusted data in enquiry reports to correctly count paid and unpaid registrations based on Paid Status flag.
- Adjusted enrolment summary reports to aggregate all offers of a course, including customised offers.
- Marketing activity form now only shows active activities for new enquiries (unless the Show All toggle button is down).
- Fixed issues with Certification Search by Student Contact & Company Add-to-list in Certification Details (External).
- On Action Detail form, after returning from the contact details (e.g. email), the form is updated to reflect the changes.

Notes

- Customised Assessment Results Report (Compact) accessible only for HVTC.
- Update 3.02a:
- Fixed bugs in Company Details form: Limit CustomerType to list and correct suburb selection crash.
 - Added Country to Company Detail form and set default country in Contact Detail and Enquiry Detail forms.
- Update 3.02b:
- Actions on RegoMoved event are now linked to related enquiry.
 - Use criteria recall on Class List Offer No criteria instead of drop-down list.
 - Modified bar chart to handle cases where the category is blank.
 - Adjusted Enquiry by Month chart to pick up Paid status correctly (all paid regos were being counted as unpaid).
 - Added option to attach an adhoc file path to an action, instead of the standard attachments.
- Update 3.02c:
- Improved performance of form letter and document field substitution processes. Expanded and adjusted form letter and document field lists, allowing for more specific contact name options. All contact fields available to all contacts (not just students), including student no, industry no, photo, name/company combination etc.
 - New enquiries are Active regardless of the database default value (relevant to non-Access implementations only).
 - AVETMISS export logic uses the Scheduled Hours entered in Result form, even if it is a Credit Transfer (60) outcome.
 - Setting a Result Code on the Result Details form only sets the Result Date if it is currently blank.
 - Option when customising an action to attach an adhoc file name, such as a customised quotation or proposal.
-

Release No 3.02i

Date 05/06/2009

Update 3.02d

- Added data conversion query (for 3.02) to replace [RegoContactXXXXX] fields with [CustomerXXXXX] fields.
- Fixed bug in AVETMISS export cause by removal of RTO Short Name field (affects new implementations only).
- Fixed bug in transcript printing.

Update 3.02e:

- Fix bug in mailing list printing and adjusted label alignment logic to improve predicatability of label size and spacing.
- Form letters are sent from the email and name of the "Signed By" contact on the form letter (if specified).
- Qualification Attempt form now updates the competency list upon entry and after all result changes are made.
- Fixed use of company criteria on Registration search form.
- Set action comments for new registration actions to include Rego No and some details.

Update 3.02f:

- Qualification Attempt Details are locked if printed and issue date is prior to today.
- Automatic certificate numbers can be edited on the Qualification Attempt Details form.
- Alternative Form Letters on Action Types, depending on whether contact has an email address.
- Added Teacher and Location criteria to Mail Out Manager, when searching by Customers or Students.
- When preview/printing Certs of Attendance in Offer Details, only the selected students are printed.
- New options for customer card format in Financial Export function: Customer Type, Course No, Course Name.
- Timetable by Offer (Detailed) now includes location directions.
- Timetable report criteria Per-Offer formats look for a teacher for Contact and "Customised For" for Company criteria.
- Fixed bug in Class List (Payment Details) and adjusted layout (slightly) to improve readability.
- Added extra phone numbers and email addresses to Class List (Customised Offers) format.
- Fixed "Invalid use of Null" bug caused when [New Contact] button used with no names in search criteria.
- Web interface registration validation routine sets display name correctly.
- Added [Class List] button to Session Detail form - displays a Per-Session class list for that session only.
- Added button to open adhoc attachment file in Action Customisation form.
- Display Student No field on the Enquiry Details form (read-only).
- Fix problem with form letters not finding default "From" email when Signed By contact is not set in the Form Letter.

Update 3.02g:

- Fixed "Allocation Amount" parameter problem in Payments Received reports

Update 3.02h:

- Updated NTIS reference lists (updated Mar 2009).
- Drop-down list for 6-digit Field of Education field in Competency and Module reference forms.
- Fixed Yes/No confirmation dialogs when deleting offers and checking surveys and assessments.

Update 3.02i:

- Fixed "All Available Statuses" option in Offer Search form.
-

Release No 3.01e

Date 07/04/2009

Summary

A minor release to implement new features requested immediately following the 3.00 major upgrade.

Major Enhancements

- Added check box option on Action Type (default) and Action (actual) to CC the salesperson of a linked rego. This may be used to update external salespeople on registrations, or job network providers, agents, etc.
- Added Assessment Type field, to categories assessments into Monitoring, Assessment, etc. This new field appears on the assessment reports and training plans. Changed Offer Details assessments to use a separate detail form.
- Added new assessment search and list forms.
- Added up to six (6) new assessment tasks which are competency based and not marked. Updated Module Details form, Result Details form accordingly. Result details form informs the operator when all tasks are complete.
- Improved layout of Result reports & added two new formats to display assessments (all 6 tasks, or just 2 tasks).

Minor Enhancements

- Changed Offer No's to use a single sequence (same format & last value as Classroom Offer No's if converted).
- Added a second automatic survey type and frequency on the course details form.
- Adjusted offer and session charts to scale better and remove blank pages when printing.
- Added Selective Print button to toolbars on offer and session charts (Access 2003 only).
- Added [Offer] link button to Registration List form.
- Contract Start/Finish Date on Student Rego Details, which override the Offer Start/Finish dates on Training Plans.
- Country automatically set to Australia when a post code is found.
- Gender and Title automatically set (Mr/Ms) when first name has a known gender in Enquiry and Contact details.
- Added a detailed check and confirmation if any non-blank result codes exist when removing a student from a rego.
- When course Training Start Date is blank, offer modules and assessments are created with blank dates.
- When Training Start Date on the Offer Details form, a popup dialog appears, giving the operator the option to use the update all module dates based on this start date and the course module schedule. This is useful if you need to wait until you have an actual start date to schedule modules. Assessment would be dated manually.
- Stopped the reversal of positions of the Ok/Cancel and Close/Delete button pairs to reduce accidental cancellations.
- Added button to invoke NewRego event on rego detail which targets the Bill-To or Customer contact.
- Improved Charge Descriptions to include course name, offer dates and student (for individual programs).
- Added form letter field "Payment Allocation List" which is replaced by a list of charges allocated to a payment.
- Quick rego function on Enquiry Detail form (Registrations page) now triggers the NewCharge event, if applicable.
- Added Balanced indicator to the Payment List form and as a criteria on the Payment Search form.
- Option to specify a URL template for a Contact Method to enable use of an eMail-to-SMS or eMail-to-Fax gateway.
- New formatting option on document & form letter layouts to split lists into multiple columns (e.g. [StudentList#1/3]).

Bugs Fixed

- Default dates in range popup dialog default to today's date are set to null values, but the calendar now starts at today.

Notes

Update 3.01a:

- New Registration form adds default RTONo from Settings automatically.
- Added [Today] and [No Limit] buttons to date range popup dialog.

Update 3.01b:

- Fixed bug with action buttons on Action Detail form with new Contact Method Media Type field for eMail actions.
- Reintroduced the Payment upon registration details to the Registration details form (for backward compatibility).
- Added format option on Mini-Statement form letter field. #+99 format shows trx from 99 days back to any time in the future). The usual #99 format works to take it from 99 days back to the Due Date of the action.
- Added popup option for a quick rego to be a fully paid, allocate Invoice & Receipt No's and trigger related events.

Update 3.01c:

- Option to use ^th format in form letters and documents to force day suffix (e.g. 1st) to superscript.
- Clear button on Enquiry Detail also resets the label over the "Enquiries by" list box.
- Corrected position and labels of Other Costs and Location Costs on the Offer Details form (Costs page).
- Adjusted Results List form Status field to incorporate result code and assessed tasks.
- Added charge allocation details to Payments Received reports.

Update 3.01d:

- Fixed (apparently) blank customer name in registration when added using [New Contact] button.
- Added Invoice No, PO No or Rego No (first available) to each line of payment allocation description in form letters.
- Contact Name search box now matches a company name (begins with).

Update 3.01e:

- Second reminder action (now denoted "Early" & "Final") on certifications and related Sent flag on Certification Award.
 - Specify a list of certifications which are upgrades to the base certification on Certification Detail form.
The automatic reminders are not created if there is a booking for a future offer for the student where the offer includes a module leading to the same certification, or an upgrade of that certification. The send flags are still set to avoid repeatedly checking the same award.
-

Release No 3.01e

Date 07/04/2009

- Completing or renewing a certification clears both the early and final reminder sent flags.
 - Added option in Course Details to specify the names of up to 8 columns to appear on assessment sheets.
 - Added new assessment sheet formats with 2, 4 and 8 columns (replacing the "multi-column" format)
 - Automatic changing of offers to Inactive checks the new assessment-based tasks for recent activity.
 - New format option #SPLIT on lists which will split a row containing a multi-line field into multiple rows.
-

Release No 3.00r

Date 16/03/2009

Summary

A major structural and interface upgrade.

Major Enhancements

Data structure changes include:

- All registration details managed on a new Registration Details form (instead of the Enquiry Details form).
- Merging of Classroom and Assessment offers into a single form with all options.
- Moving of student-specific fields (e.g. NAS Contract) from offer details to a new detail form linked to the student list.

An overhaul of the payment tracking functions:

- Payment actions and registration pricing and payment data replaced by new "charges" table. This puts all payment tracking in one place.
- GST amounts in prices, which may or may not apply the standard rate (for items which are partly GST exempt).
- Adhoc charges may be chosen from a configurable list of "extra" items such as equipment, late fees, etc.
- Surcharges and adjustments may be applied as payments are processed (e.g. credit card surcharges, early payment discounts, etc).
- New payment plan option for up to 4 specific payment amounts on days relative to the offer start date.
- New Aged Debtors report (on Management menu).

Interface Improvements include:

- New graphical menus with more detailed access control.
- Ability to recall the last contact, offer and dates used in search and report criteria forms.
- New Step-by-Step "New Registration" process and slightly faster "quick-registration" process.
- All accessible report forms can be quickly selected from a combo box on the main menu.
- Adjustments to registration and offer search & list forms due to the data structure changes.
- "Customised" flag renamed to "Private" flag to better reflect it's use as a way to block new registrations.
- Option for anyone to synchronise contacts with Outlook.
- New option to synchronise sessions to Outlook appointments, including a class list for each session.

Minor Enhancements

As well as many minor changes required as a consequence of the structural changes (too numerous to list here), the following additional minor changes were implemented:

- Results with an outcome code of 51 (RPL Granted) appear on statements of attainment automatically.
 - Test print button on Action Detail form to print a form letter for any contact method without setting the completed flag.
 - Added new fields to contact details ("Alternate" page) to manage VET FEE-HELP eligibility.
 - Option to schedule multiple offers by specifying a repeating period and date limit in the Schedule New Offers form.
 - Customer Type added to company details, which is set automatically on contact record when a company is selected.
 - When adding a new action on the Enquiry Details form, the operator is asked which registration to link to (if 2 or more).
 - Further refinement of date range picker with extra options, re-arranged into Past, Future, Present & Financial groups.
 - Statement date defaults to result date (not current date) when set manually on the Result Details form.
 - Expiry duration (in months or whole years) can be included on form letters (usually certification renewal letters).
 - In Offer Detail form Sessions page, user can no longer make the offer share the same session twice.
 - New Sales Report format to list sales by Company with total students and price.
 - More space for comments on the Action Detail form, which now resized with the window.
 - Additional Action Reports, including completion criteria, adjustment of existing reports and new statistical reports.
 - New reports to show the Course and Qualification structures (to help check that the configuration is correct).
 - Added last modified, last validated and notes to modules. Added report to help document this data.
 - Document name "contains" criteria added to document search.
 - New event for when new assessments are added.
 - New button on Back-End Re-Linking form to disable macro security in Access 2007.
 - New enquiry analysis reports by options of interest and region/site of interest (based on location of interest).
 - New contact details and phone list reports, including a general-purpose datasheet format.
 - Enquiry search address criteria & contact search suburb criteria are matched against residential addresses.
 - New events to trigger when an offer (or program) is scheduled, targeting the teacher (or assessor).
 - Learner Unique Id (used in Qld) now labelled "Delta No" in Vic or "Learner No (State)" elsewhere.
 - Added optional start/finish dates for structured training within the nominal offer start dates. Added option in course details to set default days for this, relative to nominal offer start date, and option to change status automatically.
 - New option to automatically generate renewal letters for expiring certifications on a daily basis.
 - Option to specify an AVETMISS reporting year for attempts (it may not be the year of issue in some cases).
 - New option to specify a default assessment schedule in the course details.
 - New option on course details to quickly add a default assessment for each module.
 - Victorian training plan layout used when Home State System Setting is "VIC".
 - Group certificate of attendance option (e.g. to certify inductions for a work area).
 - The system now prevents more than one operator from sending emails simultaneously, to avoid double-sending.
 - New options to print mailing labels for recipients of certificate / statement documents.
-

Release No 3.00r

Date 16/03/2009

- Organisational Status report expanded to summarise enrolments and offers by course and status.
- New evaluation survey layout options, including table-based layout for Quality Indicator survey questions and a standard layout with student names pre-printed on the forms.
- When setting the teacher on the session detail form, the system automatically records the teacher in the first available teacher name in all related offers (if there is one available) or prompts to change the offer teacher otherwise.
- New button on Offer Details form (Result page) to manually issue Statements for all students in the offer.
- New Statement Register format on Results Report form.
- New option to check capacity of offers using the capacity of the location for all sessions in the offer.
- New options on the Course Details to automatically generate and label multiple evaluation surveys based on offer, module or session dates.

Bugs Fixed

- Fixed crash on offer chart when several very long fields make the multi-line description too long to display.
- New actions added in the Enquiry Details form are linked to the only (or selected) registration every time.
- After printing statements or certificates on the Result Details, the position in a multiple result form is retained.
- Use of Customer Type criteria in Mail-Out Manager (Mailing Lists page) now works properly.
- Checklist items now sorted in the order of their Sort Order values (general and course-specific may be merged).

Notes

Update 3.00a

- In Offer Details (Registrations page), included both enquiry and rego view buttons and automatically assume that in one-item lists the single item is selected.
- Added control tips to all contact detail buttons and tidied up registration and student buttons on Student page.
- Fixed problem with registrations when using "Session" capacity planning without data in place.

Update 3.00b:

- Option to double-click on Offer Detail Registrations page lists to go to details for a single item.
- Refresh question list when adding questions to a newly created or renamed Survey Type.
- Fixed problem with blank Help Popup item.
- Total price on Rego Detail no longer cleared when changing students and there is no per-student price.
- New Registration function adds course of interest in enquiry automatically.
- Fixed "another user locked this record" error when opening a rego in Enquiry Details form, after using "Quick Rego".
- Added new option to New Registration form to allow offers to be customised but still available.
- Fixed problem with opening offer or RPL forms after completing the New Registration process.
- Added option on Action Type Detail form to mark action types for use in issue tracking.
- Fixed problem preventing qualification attempts to be deleted.
- Added option in New Rego form to ask whether the customer is also a student.
- Fixed problem with offer bookings counts not being updated when registrations were deleted.

Update 3.00c:

- Due date of manually created actions set to current time instead of X days ahead.
- Fixed problem preventing Student Registration event trigger button.

Update 3.00d:

- Added Location, Teacher and Customised columns to offer list in New Rego form (pre-scheduled offer page).

Update 3.00e:

- When customising a form letter action, fields in the Subject Line are replaced with actual data values.
- Fixed the location contact name field in the assessments by offer report.
- Removed edit on Offer detail linking the "Private Offer?" flag to the "Customised For" field.
- Removed redundant code to support AVETMISS 5, including Release No option and RTO Short Name field.
- Removed redundant AVETMISS logic requiring Scheduled Hours to only be reported in a single collection period.
- Change AVETMISS logic to force scheduled hours to zero if outcome is 60 (Credit Transfer) for all reporting authorities.
- Added teacher criteria to Results reports (Result Listings and Statement Register formats)

Update 3.00f:

- Display total paid and balance figures on Charge Detail form.
- Changed conversion routines to copy NAS data from Assessment-Based Programs to Student Rego Details.
- Show registrations in offers with no course specified in the Enquiry Search form Rego list with Course "(Unknown)".
- Removed redundant fields and list items related to AVETMISS 5 standard.
- Fixed problem preventing Sales chart by month from opening.

Update 3.00g:

- Fixed problem preventing MYOB and QuickBooks payment exports from working.

Update 3.00h:

- Fixed logic in certification automatic reminders.
- Changed HTML editor validation to replace blank Alt Text tags with default value and warn the operator.
- Fixed problems with Session Schedule Chart
- Fixed problem with Quickbooks Invoice Export function.
- Added alternative menu layouts with labelled buttons.

Update 3.00i:

- Correct problem with monthly sales chart.
-

Release No 3.00r

Date 16/03/2009

Update 3.00j:

- Added editable Charge Type to Charge Detail form.
- Changed payment schedule fields in Form Letters to reflect new charge structure. Added option for Extras list.

Update 3.00k:

- Fixed bug with StudentName field when previewing or printing Transcripts.
- Statement Issue Date set to Result Date (not today) when automatically set due to printing in Result Detail form.

Update 3.00L:

- Fixed crash bug with AVETMISS export, using student or rego flags to select, on SQL-Server implementations.
- AVETMISS export uses Student Rego level Contract Id instead of old Offer-based value.
- On Site Details form, setting the Suburb or State to an Australian value now sets the State Code correctly.
- Changed Offer No on AVETMISS Export from combo box to text box with criteria recall button.
- Added Employer and Host Employer contacts to Student Rego Details, and use these on Training Plans.

Update 3.00m:

- Resolved issues deleting offers, when checking for completed assessments and surveys with responses.
- New Rego form, for individual programs, automatically creates a qualification attempt (when appropriate).
- Default offer module dates based on structured training start day, if specified, instead of offer start.
- Adjusted validation edits on course details to adjust for structured training start day reducing the allowable range.
- When employer is entered on New Rego form, it is now copied to the student registration details.

Update 3.00n:

- Added confirmation popup when exporting invoices and payments.
- Changed form letter print queue to show actions without contacts (e.g. offer-based actions).
- Corrected error with due date criteria on payments due report.
- Corrected problem with Contact Merge occurring when company name is relatively long.
- Added option to set a specific Group Cert of Attendance on the Course Details form.

Update 3.00p:

- On Certification Awarded Detail form, moved Issued Date to general area and Assessor to Internal area.
- Course Content module list sorted by Group, Day and Module, remove automatic refresh and added [Refresh] button.
- Display Teacher Names in full on System Settings Graphics page (not just last name).

Update 3.00q:

- Added links from actions to charges and payments and related fields on form letters, for use in invoices & receipts.
- Fixed bug with charges of merged contacts. Charges were staying linked to the (deleted) merged contact.
- Salesperson (from Enquiry), Commission Rate and Amt now set automatically on Registration Detail form.

Update 3.00r:

- Fixed bug in Enquiry Details form triggering a known bug in MySQL ODBC driver (affected MySQL back-ends only).
-
