For hard wearing natural surfaces

... nationwide

This extensive network allows us to provide every client and every project, wherever it's location, with products and service levels that meet the most stringent performance specifications.

# dedicated to **quality**

Loksand is all about **performance**.

It's about a product that delivers your goals across a **wide range of applications**.

And it's about utilizing Loksand with **market leading expertise**.

# when performance matters

The Loksand Team is able to provide a vast range of products and services for utilization throughout the construction and post construction phases.

## Construction Services

We have access to some of Australia's leading sportsturf and landscape construction personnel along with state of the art specialized plant and equipment, irrigation technicians, sportsfield drainage specialists and turf producers.

## Project Management

We are able to provide a proven track record when it comes to total and all inclusive project management services. It doesn't matter the size or cost of the project, Loksand will deliver it on time and on budget.

## Loksand Fibre

Loksand is our unique and proven stabilizer fibre for use in sandy and loam type soil conditions. It is suitable for a wide range of applications including sportsfields, equestrian, racetracks and high use amenity turf areas, in fact any natural surface which requires enhanced load bearing.

## LokTurf

LokTurf is the turf replacement product which compliments Loksand Fibre constructions or in fact any high wear natural turf area where turf replacement is an ongoing maintenance issue and asset closure is not possible - instant use.

## QuadLok

QuadLok is an extension of LokTurf where the client has the ability to grow and maintain smaller quantities of LokTurf in a self contained turf nursery for immediate small scale turf replacement. QuadLok is available in any rootzone material and grassed with any turfgrass, warm or cool season.

## Maintenance Services

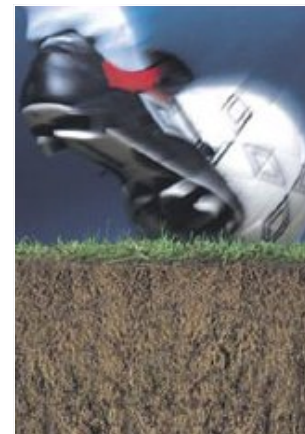

Once your new construction has been completed, our team is able to offer total or partial ongoing maintenance support. This can be as simple as one time operations such as topdressing or aeration right through to total all inclusive programs.
